## TOUCH AND GO

### MERCHANT-FRIENDLY PERFORMANCE

- Wireless connectivity for mobile payments virtually everywhere business takes place
- Exponentially increased memory facilitates additional payment applications like loyalty programs and gift cards
- Unprecedented speed and higher quality components for faster transaction processing and downloads
- The ultimate in security protection with VeriShield Total Protect, secured by RSA, to keep cardholder data secure by encrypting it from end to end

### ON-THE-GO BRILLIANCE

- Small, full-function portable device
- Based on the world's best-selling Verix platform with millions of devices sold
- Game-changing enhancements including three times faster processing, increased memory and the capability to accept alternative payment options

### CUSTOMER-FRIENDLY FEATURES

- Eye-catching graphics pop on the large, color touch screen – visible even in low light
- Slim, ergonomic design ideal for customer handover
- Clearly visible, illuminated keypad is spill-resistant and durable even under the most-demanding conditions
- Integrated signature capture and stylus for on-the-go transactions
- Optional built-in contactless technology opens the door for even more ways to pay

3.5" color touch screen

Wireless connectivity options include GPRS Bluetooth/Wi-Fi combo or 3G

Durable keypads designed to exceed 1,000,000 key presses

Blue-backlit, spill-resistant keypad

Smart card readers built for 500,000 insertions
